SUBJECT INDEX TO VOLUME 63

Acetylene, methane monooxygenase and, 273
Acyclovir monophosphate, synthesis of coordination compound, 41
Adenosine systems, copper(II) ions and, 191
Alkali ions, montmorillonite catalyzed peptide bond formation and, 119
Alkaline metal ions, montmorillonite catalyzed peptide bond formation and, 119
Aluminum
  commercial ATP and, 241
  montmorillonite catalyzed peptide bond formation and, 119
Amino sugars, copper(II) and, 231
Ammonium ions, montmorillonite catalyzed peptide bond formation and, 119
Antimicrobial activity, copper(II)-phenanthroline complexes, 291
Antitumor activity
  palladium(II) complexes of dialkyl α-anilinobenzylphosphonates, 125
  Pt-Berenil compound, 57
  titanocene dichloride, 183
Aqua-glycylglycinato-imidazole-copper(II), spectroscopic and electrochemical behavior, 19
ATP, commercial, aluminum and, 241
Bacteriophage T7, metal-ion discrimination by, 1
Carnosine, copper(II) interactions, 19
Chromium(II), oxidative DNA cleavage and, 265
Copper
  copper ion interaction with DNA, 79
  copper^{2+} ion interactions with envelope protein fragments of hepatitis B virus, 49
  copper(II) and amino sugars, 231
  copper(II) and oxidative DNA cleavage, 265
  copper(II)/carnosine interactions, aqua-glycylglycinato-imidazole-copper(II), 19
  copper(II) complexation with oligopeptides, 99
  copper(II) complexes
    polyuridylic acid and, 155
    synthesis of guanosine-5'-monophosphate analog, 41
  copper(II) complexes and 2-methyl-amino pyridine, 143
  copper(II) coordination with glycylsarcosyl-L-histidylglycine, 29
  copper(II) ions and metal-free adenosine-polyamine systems, 191
  copper(II)-phenanthroline complexes, antimicrobial activity, 291
[$CuH_{-1}L$] complex, hydrolysis, 29
  methane monooxygenase and, 273
  trichlorobis(N^6-benzyl adeninium) copper(II) chloride dihydrate, 175
D-glucuronic acid, vanadyl(IV) complex and, synthesis and characterization, 285
Dialkyl α-anilinobenzylphosphonates, palladium(II) complexes, 125
DNA, metal ion interaction, 79
DNA modification, Pt-berenil compound and, 57
Dodecyl benzene sodium sulfonate, voltammetric responses of hemoglobin and, 207
Drug photosensitization, molecular mechanism, 253
Escherichia coli, copper(II)-phenanthroline complexes and, 291
Ethidium bromide, binding to Z-DNA, 9
Exchangeable cations, montmorillonite catalyzed peptide bond formation and, 119
Glycylsarcosyl-L-histidylglycine, copper(II) coordination, 29
Gold(III), phage T7 for metal-ion discrimination, 1
Guanosine-5'-monophosphate analog, synthesis, 41
Heme, iron environment in heme-antimalarial complexes, 69
Heme-antimalarial complexes, Mössbauer spectroscopy, 69
Hemoglobin, voltammetric response, 207
Hepatitis B virus, copper^{2+} ion interactions with envelope protein fragments, 49
Homopolynucleotide polyuridylic acid, copper(II)-complexing behavior, 155
Iron, heme-antimalarial complexes, 69
Magnesium(II), phage T7 for metal-ion discrimination, 1
Malaria, iron environment in heme-antimalarial complexes, 69
Manganese
  manganese ion interaction with DNA, 79
  manganese(III) and oxidative DNA cleavage, 265
Metal complexes, metal-ion-dependent oxidative DNA cleavage, 265
Metal ions
  interaction with DNA, 79
  phage T7 for recognition and complexation, 1
Metal-nucleobase interactions, trichlorobis(N^6-benzyl adeninium) copper(II) chloride dihydrate, 175
Methane monooxygenase, copper and, 273
Methyl-β-L-daunosamide, copper(II) complex formation and, 231
2-Methyl-amino pyridine, copper(II) and, 143
Montmorillonite catalyzed peptide bond formation, exchangeable cations effects, 119
Morin, aluminum contaminated ATP and, 241
Naproxen, inorganic ion effect on membrane damage with, 253
Nickel
  nickel ions interaction with DNA, 79
  nickel(II) and oxidative DNA cleavage, 265
Nucleic acids, trichlorobis(N^6-benzyl adeninium) copper(II) chloride dihydrate, 175
Oligopeptides, copper(II) complexation with, 99
Palladium(II) complexes, dialkyl α-anilinobenzylphosphonates, 125
Peptides
  copper^{2+} ion interactions with envelope protein fragments of hepatitis B virus, 49
  copper(II) complexation with oligopeptides, 99
  copper(II) coordination with glycylsarcosyl-L-histidylglycine, 29
  montmorillonite catalyzed peptide bond formation, 119
Phenanthroline ligands, copper(II)-phenanthroline complexes, antimicrobial activity, 291
Photohemolysis, naproxen-induced, 253
Photosensitization, molecular mechanism of drug, 253
Platinum complexes, ethidium bromide binding to Z-DNA and, 9
Poly-amino acids, poly-l-lysine and ruthenium polypyridyl complexes, 215
Poly-l-lysine, ruthenium polypyridyl complexes and, 215
Polyamine systems, copper(II) ions and, 191
Pt-Berenil compound, DNA modification and, 57
Ruthenium polypyridyl complexes, poly-l-lysine and, 215
Sodium dodecyl sulfate, voltammetric responses of hemoglobin and, 207
Solvent effects, copper(II) complexation of polyuridylic acid, 155
Staphylococcus aureus, copper(II)-phenanthroline complexes and, 291
Superoxide dismutase-like activity, copper(II) complexes and, 143
Titanocene dichloride, Watson-Crick base pairing and, 183
Trichlorobis(N^6-benzyl adeninium) copper(II) chloride dihydrate, synthesis and crystal structure, 175
Vanadyl(IV) complex, D-glucuronic acid and, synthesis and characterization, 285
Voltammetric responses, hemoglobin and, 207
Watson-Crick base pairing, titanocene dichloride coordination effects, 183
Z-DNA, ethidium bromide binding, 9
